Lets go with space sign editorial design.

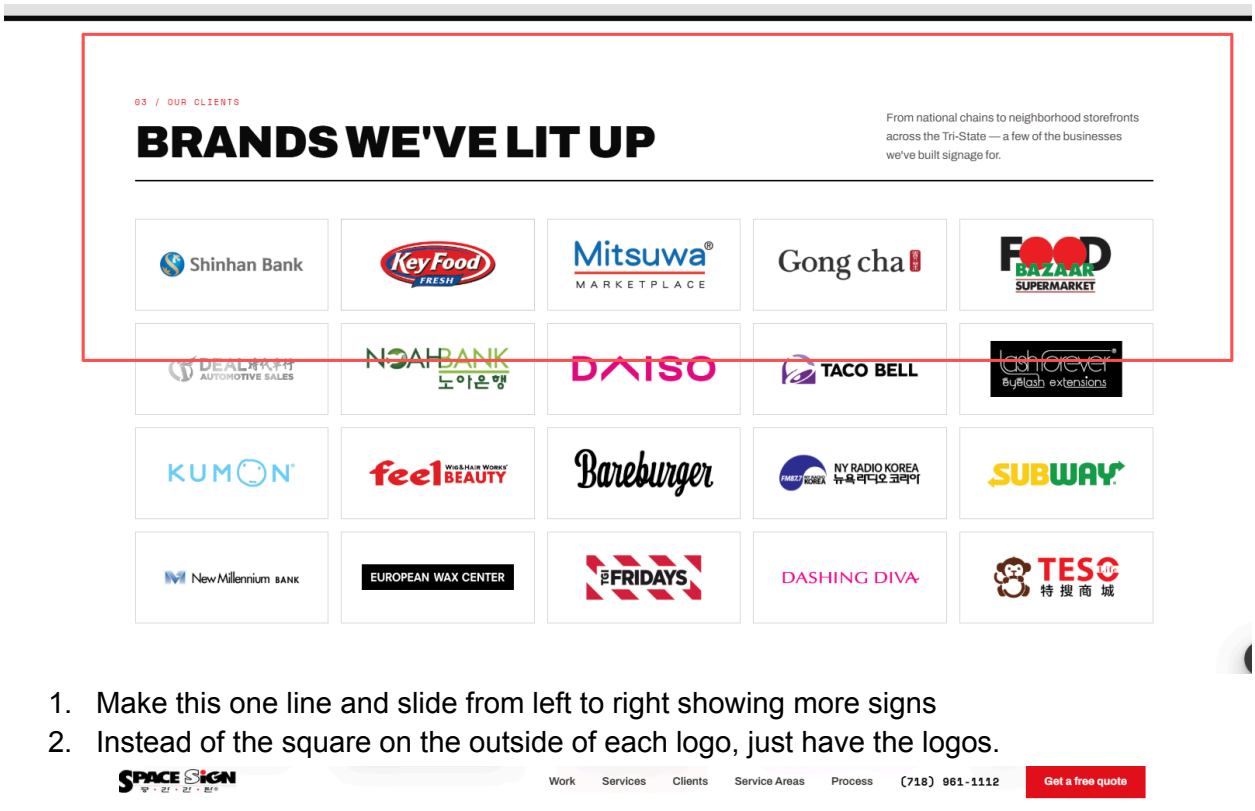

1. Remove this stores image from the top banner.
2. Remove the phone number on the top.
3. Make the menu bar words alittle bigger.
4. Change service areas to permits and add another tab labeled violations.
5. Change clients to about us.
6. Make the phone number all the same format.

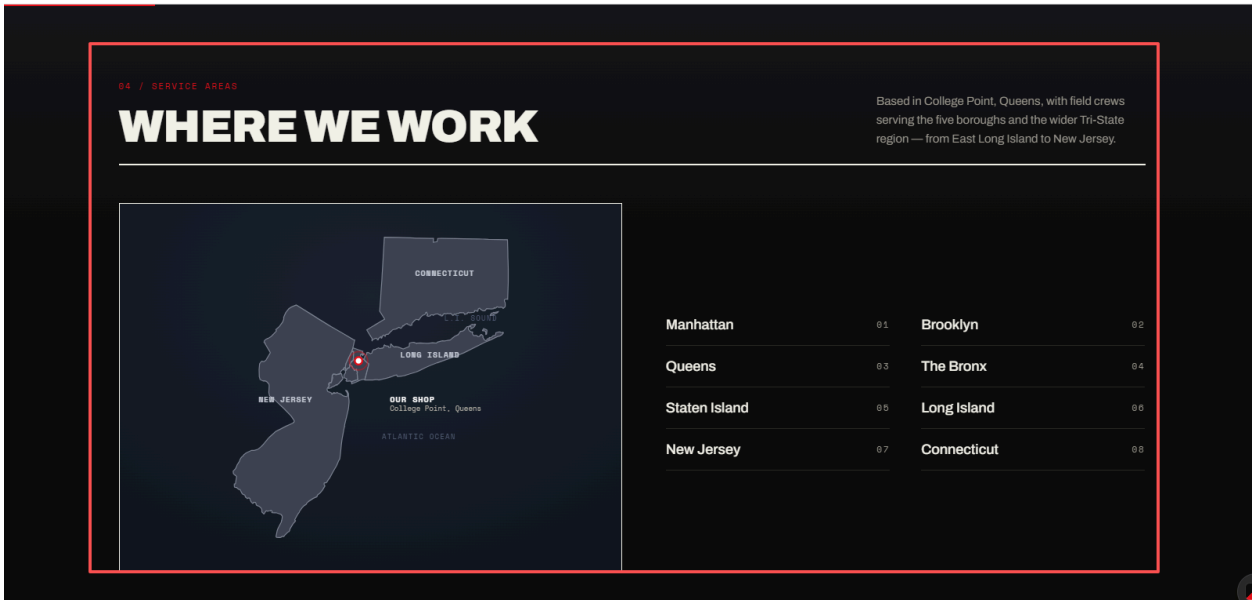

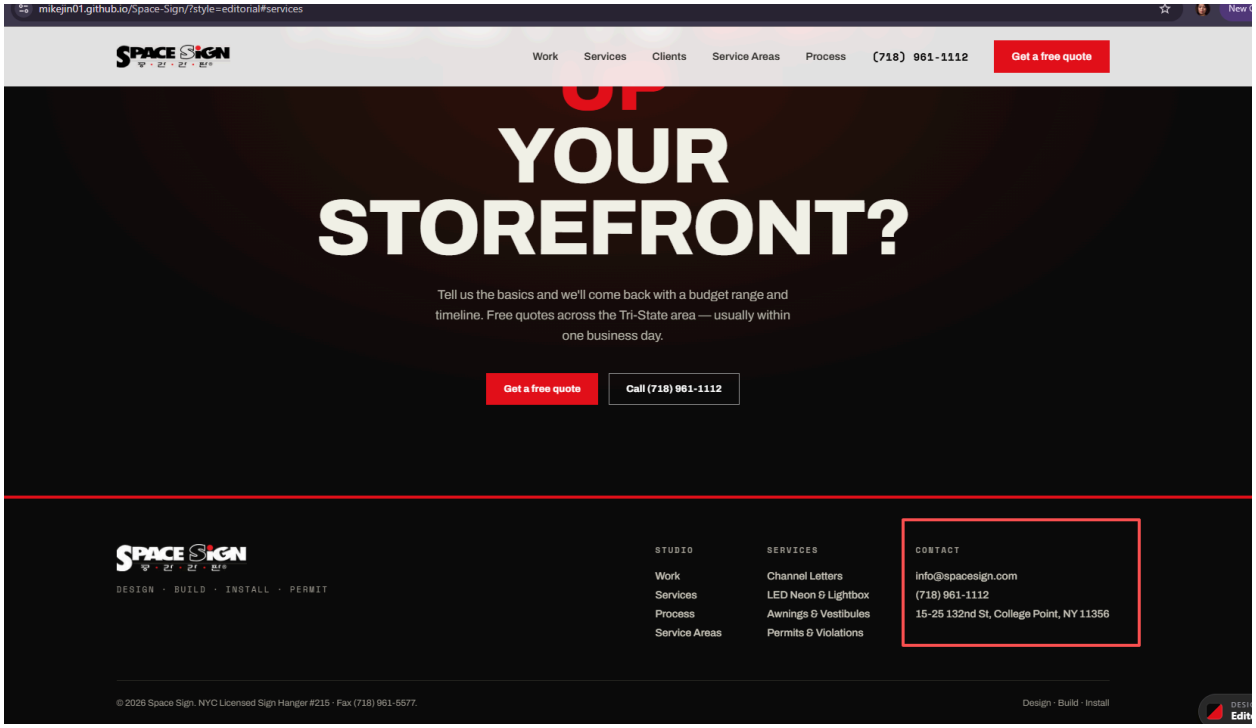

1. Please make sure all the edges on this page for the templates are rounded. No harsh squares.

1. Make this one line and slide from left to right showing more signs
2. Instead of the square on the outside of each logo, just have the logos.

1. This on the home page remove and change it to an image of their store front. And then a small bio on the right of “about us”

1. Add their business hours here. Find on google.
